

CRCHI Presentation

Company Overview

China Railway Construction Heavy Industry Co., Ltd. (CRCHI) belongs to China Railway Construction Corporation (CRCC). It is an high-end equipment manufacturer, featuring innovation, technology and service. Its main business indicators has increased by over 30% for consecutive ten years. The company now has a total of 7500 employees, of which more than 20% are research personnel.

Company Overview

CRCHI has developed "4+X" fields of business, including four mature sectors which are tunnel boring machine, specialized tunneling equipment, rail track equipment, large rail track maintenance machinery, and other emerging industries like new-type rail transit equipment, high-end agricultural equipment and new-type engineering materials.

The company, with its headquarter in Changsha, has established 16 subsidiaries and production bases in Zhuzhou of Hunan Province, Kunming of Yunnan Province, Longchang of Sichuan Province, Lanzhou of Gansu Province, Urumchi of Xinjiang Province, Xi'an of Shaanxi Province, Baotou of Inner Mongolia and other cities.

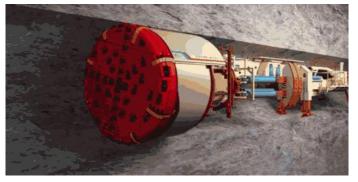

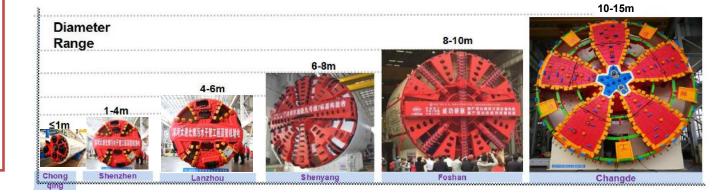

CRCHI has world-class and national leading TBM manufacturing bases, with an annual production capacity up to 200 sets of TBMs. CRCHI TBMs take half the domestic market in sales, of which largediameter hard-rock TBM occupies over 85% of Chinese market share. Our TBMs have been widely used in national important projects of metro, railway, mining and water diversion in over 30 cities, and also exported to Russia, Turkey, Sri lanka and other countries.

Products•Tunnel Boring Machine

Earth pressure shield machine (ZTE serie)

Slurry pressure shied machine (ZTS serie)

Hard-rock TBM (ZTT_serie)

Dual-mode TBM (ZT**serie) **Pipejacking** machine ZTPserie)

Vertical shaft/inclined shaft TBM (ZTJ serie)

Rectangular **TBM** (ZTR serie)

Multi-function soft soil TBM (ZT** serie)

77 kinds

- 1. Small diameter
- 2. Fast tunneling
- 3. Construction in extremely cold weather
- 4. Super small turning
- 5. Gerneral type

21 kinds

- 1. Economy
- 2. Gerneral type
- 3. Small diameter
- 4. Big diameter

.

kinds

- 1. Long-distance tunneling & long service time
- 2. Small type
- 3. Gerneral type

6 kinds

- 1. Slurry&Earth pressure off-line dual mode
- 2. Hard rock TBM/Earth pressure dual mode
- 3. Inclined shaft dual mode
- 4. Hard rock TBM/Earth pressure online dual mode.....

5 kinds

- 1. Super small type
- 2. Retractable
- 3. Ouick drill -onetime vertical drilling
- 4. Long distance
- 5. Muck discharge by a screw

2 kinds

- 1. Vertical shaft **TBM**
- 2. Inclined shaft single-shield **TBM**

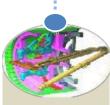

.

2 kinds

1.Rectangular pipejacking machine

2. Pipe gallery operating vehicle

1 kind

1. Special-section TBM

8 categories of TBMs Application range covers:

- Soft soil, hard rock and other complicated geologies
 - Roung, rectangular and other section shape
- Single mode, dual mode and other tunneling modes
- Straight, curve and inclined shaft and other alignment

Products•Specialized Tunneling Equipment

Based on mechanized construction. information management, intelligent construction, collaborative innovation of construction method and equipment, CRCHI has developed 4 product series for specialized tunneling equipment, with intelligent tunneling equipment as the core, including tunnel construction equipment, coal mine construction equipment, mine construction equipment and green building materials construction equipment. We take the lead in building technical systems of intelligent tunneling **equipment** in China. We help to promote development of Chinese intelligent tunneling construction.

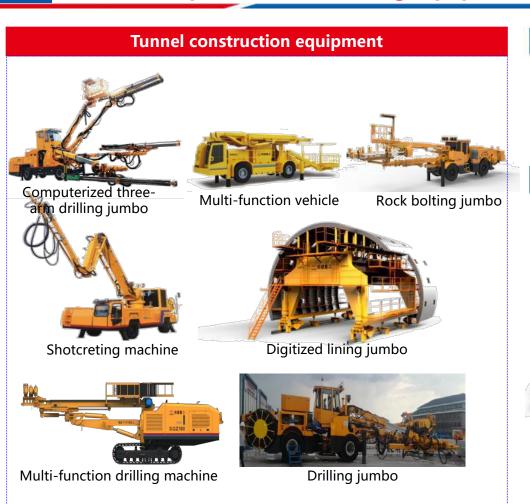

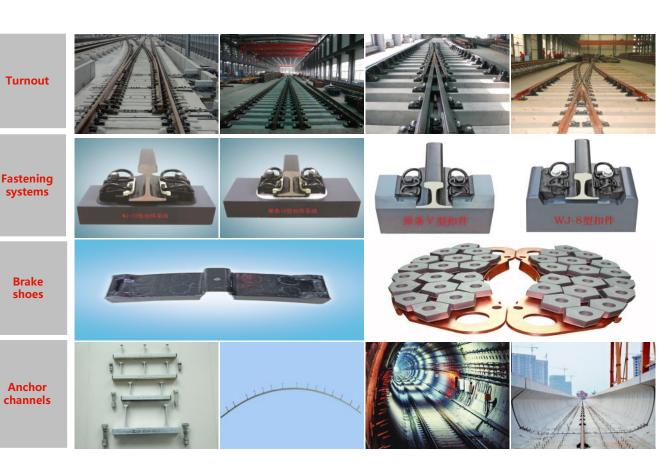

Products•Specialized Tunneling Equipment

CRCHI has the best automated production lines for turnouts, clips and fasteners, brake shoes and anchor channels. We have successfully produced dozens of international advanced level **products** like No.42 turnouts to 60kg/m rails for the 350km/h passenger train and high-speed railway fastening systems. These products occupy 1/3 of Chinese market share and help to increase the speed and comfort level for Chinese high-speed train. They have been sold to over 30 countries and regions like America, Canada, African countries and Western Asian area.

ingot milling steel fiber, basalt fiber, basalt fiber, basalt fiber products and other new-type green engineering materials. Ingot milling steel fiber products have been successfully applied in the project of Yangmeidu Bridge in Ganzhou of Jiangxi Province.
